

# EMERGENCY MANAGEMENT OF ACUTE CORONARY SYNDROMES

## PRACTICAL, HANDS-ON, 8-HOUR COURSE

- Developed by experts in cardiology, emergency medicine, and prehospital care
- Updated and improved continuously
- Used to train thousands of EMS personnel in 12-lead ECG and its interpretation
- Includes particular emphasis on ST-elevation myocardial infarction
- Provides a focused Prehospital Checklist and Algorithm

## MAJOR LEARNING GOALS:

- Explain the differential diagnosis of chest pain and describe signs & symptoms of acute coronary syndromes
- Perform a focused cardiovascular exam, list indications for and perform a 12-lead ECG and systematically interpret ECGs
- List the current inclusion and exclusion criteria for thrombolytic therapy
- Describe the current standard of care, including initial treatment, reperfusion strategies, and adjunctive therapies
