

Active Shooter Hostile Events

Tactical and Medical Response Training Program

Supported by a grant from the Florida Department of Education

COURSE INFORMATION:

- Designed for public safety personnel, including law enforcement officers and medically trained first responders.
- Focused training on the basic tactical and medical care interventions that will help save an injured victim's life.
- Incorporates principles of the United States military Tactical Combat Casualty Care (TCCC) & meets the recommendations and standards of the International Public Safety Association (IPSA), InterAgency Board, Hartford Consensus Statement, and Tactical Emergency Casualty Care (TECC) guidelines.
- Includes interactive, hands-on skills stations, simulated active shooter scenarios and debriefing.

MAJOR LEARNING GOALS:

- Adopt adaptive response strategies to incidents of mass violence.
- Learn mass trauma management and life savings skills in simulated environments.
- Navigate through the incident area, locate casualties and perform triage.
- Implement techniques, tools and strategies to effectively response to incidents of mass violence involving an active shooter or explosive devices.
- Collaborate with law enforcement personnel to achieve optimal response.
