

# Motorcycle Collision Prehospital Education Program

**Funded by the Florida Department of Transportation**  
**2 hours of continuing education credit**  
**Free for Florida First Responders**

## INTERACTIVE 2-HOUR ONLINE COURSE

- Addresses how to manage motorcycle collisions, which account for a disproportionate burden of vehicle fatalities in the U.S.
- Provides the core cognitive knowledge to rapidly evaluate, stabilize, and transport the motorcycle crash patient
- Is participatory and simple to navigate, with easy-to-read text, graphics, and voice-over narration
- Can be completed in multiple sessions

## MAJOR LEARNING GOALS

- Describe the magnitude of the motorcycle crash injury burden in Florida
- List the components of a motorcycle injury prevention program
- Discuss the difference in injury risk between motorcycle collisions (MCCs) as compared to motor vehicle collisions (MVCs)
- Describe the risk factors that contribute to MCCs
- Summarize the different types of MCCs and how the mechanism of blunt injury can affect triage decisions
- Describe the basic and advanced skills for patient management and stabilization
