Harvey® Learners

HIGHLIGHTS & ACHIEVEMENTS IN 2020

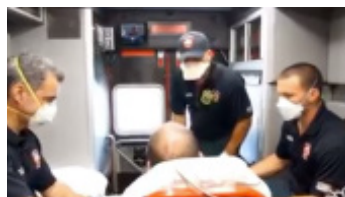

HARVEY® TURNS 50

Harvey® is the longest continuous university-based simulation project in medical education, and no other simulator presents cardiac bedside findings at the level of detail and fidelity found in Harvey®.

ARMY TRAUMA TRAINING & SPECIAL OPS TEAMS

Continuing our longstanding partnership with the US Army and Special Operations Military Teams, lessons learned from the military allow us to transfer critical life-saving techniques to first responders.

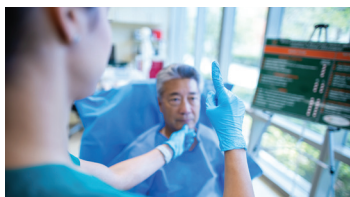

TELEMEDICINE IN FIRE RESCUE TRUCKS

Developing technology allowing first responders to communicate with local hospitals and make triage decisions to treat patients more quickly when seconds count.

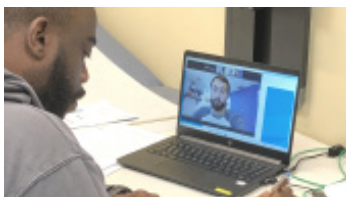

TRAINING & CERTIFICATION DURING COVID-19

Implementing new methods to ensure first responders can safely re-certify for Advanced Cardiac Life Support training.

ADVANCED STROKE LIFE SUPPORT® (ASLS)

Partnering with American Heart Association to develop an online course: Stroke Care During the COVID-19 Pandemic which trained more than 3,000 registrants worldwide.

VIRTUAL LEARNING

In response to COVID-19, combining in-person instruction with remote virtual training so learners can still acquire life-saving skills.

RAPID RESPONSE TEAM TRAINING

Improving the quality and safety of patient care by creating effective hospital-based rapid response teams who save lives in emergency situations.
