

Essential Neurologic Examination

A UMedic e-learning program that effectively teaches the neurologic examination

Cranial Nerves

Reflexes

Presents the complete neurologic examination of a normal patient, including mental status, cranial nerves, motor, sensation, reflexes, coordination, gait and station

Quality and Benefits

- ✓ Based on American Academy of Neurology Guidelines
- ✓ Videos of neurologist examining a patient
- ✓ Practice exercises
- ✓ Can be performed in minutes, once learned
- ✓ Incorporates latest curricular design
- ✓ Developed and tested by multiple medical centers

Multiprofessional Use

- ✓ Trains students, residents, physicians, physician assistants, nurses and nurse practitioners
- ✓ Self-learning or classroom
- ✓ Saves faculty time
- ✓ Interactive and engaging
- ✓ Excellent for non-neurology practitioners
- ✓ Provides standardized learning

Examination Components

- ✔ Mental Status
- ✔ Cranial Nerves
- ✔ Motor
- ✔ Sensation
- ✔ Reflexes
- ✔ Coordination
- ✔ Gait and Station

Special Features

- ✔ Patient videos with faculty commentary
- ✔ Emphasizes both correct and incorrect techniques and common exam errors
- ✔ Practice exercise following each section with immediate feedback
- ✔ Simple method to review select exam components
- ✔ Accessible via any internet browser
